

SIMATS ENGINEERING (SAVEETHA SCHOOL OF ENGINEERING)

Department of Computer Science and Engineering

ASSESSMENT TOOL 2 – TECHNICAL PRESENTATION

Course Code:	ITA0302	Course Title:	Mobile computing
CO Assessed:	CO3 – Precision (BL3)	Assessment:	Assessment Tool 2 – Technical Presentation
Weightage:	30 % of CIA	Total Marks:	20 (Answer ANY ONE)
CO3 Statement:	Implement wireless networking and Mobile IP concepts for routing in cellular and ad hoc networks.. (BTL 3)		
Student Name:	DINDU PUJITHA	Reg. No.:	192373037
Section / Batch:	Slot D	Date:	06-08-2026

Code of Conduct

I DINDU PUJITHA (192373037) certify that this submission is my original work and that I have adhered to the guidelines specified for this assessment. I understand that any violation of academic integrity rules will result in disciplinary action.

Signature of the Student: D PUJITHA

Instructions

- Duration: 10 minutes

Questions

1. A hybrid FDMA/TDMA system allocates 25 carriers $\times$ 8 slots each. If 15% of the total slots are reserved for signaling, derive the net number of channels available for actual user traffic, showing the full calculation. Discuss why this signaling overhead exists even in a "hybrid" system design, and how it compares proportionally to signaling overhead in a pure FDMA or pure TDMA system.
