

SIMATS ENGINEERING (SAVEETHA SCHOOL OF ENGINEERING)

Department of Computer Science and Engineering

ASSESSMENT TOOL 1 – MCQ

Course Code:	ITA0302	Course Title:	Mobile computing
CO Assessed:	CO2	Assessment:	Assessment Tool 1 – MCQ
Weightage:	60 % of CIA	Total Marks:	20 marks
CO2 Statement:	<i>Compare mobile communication technologies, including multiple access techniques and network evolution, based on performance and applications.</i>		
Student Name:	DINDU PUJITHA	Reg. No.:	192373037
Section / Batch:	SLOT D	Date:	21/07/2026

Code of Conduct

I DINDU PUJITHA(192373037) certify that this submission is my original work and that I have adhered to the guidelines specified for this assessment. I understand that any violation of academic integrity rules will result in disciplinary action.

Signature of the Student: D PUJITHA

Instructions

- This test contains ONE question.
- Duration: 30 minutes.

Annexure A - QUESTIONS

Summary - Quizizz

1. A network engineer is designing a new cellular system for a densely populated urban area. The primary challenge is the extremely high user density, leading to significant co-channel interference. To maximize spectral efficiency and user capacity, the engineer decides to implement a multiple access scheme that allows multiple users to share the same frequency channel at the same time by separating them based on their unique spatial signatures. This technique requires advanced antenna arrays and signal processing to steer
