ASSESSMENT TOOL 2 – UI CREATION

Course Code:	ITA0302	Course Title:	Mobile computing
CO Assessed:	CO5	Assessment:	AT2 – UI CREATION
Weightage:	60 % of CIA	Total Marks:	100
CO5 Statement:	Design, implement, and deploy mobile applications using appropriate development environments.		
Student Name:	DINDU PUJITHA	Reg. No.:	192373037
Section / Batch:	Slot D	Date:	20/08/2026

Code of Conduct

I DINDU PUJITHA(192373037) certify that this submission is my original work and that I have adhered to the guidelines specified for this assessment. I understand that any violation of academic integrity rules will result in disciplinary action.

Signature of the Student: D PUJITHA

Instructions

- Students must select one scenario from the given list and design the corresponding mobile application UI.
- The application should contain a minimum of 5 screens and a maximum of 8 screens.
- The UI should include appropriate elements such as text fields, buttons, icons, images, cards, menus, lists, and navigation components wherever required.
- Students should maintain a consistent design throughout the application with respect to colours, fonts, icons, spacing, and layout.
- The application should provide a clear navigation flow between different screens.
- The design should be simple, user-friendly, and suitable for college students.
- Each screen should have a clear purpose based on the selected scenario.
- Students should include appropriate input, selection, confirmation, and result screens wherever the scenario requires them.
- Students should consider basic usability principles, including readability, accessibility, proper alignment, sufficient spacing, and intuitive navigation.
- The UI should be designed for a mobile phone screen and should not resemble a desktop or web application.

- Students should include suitable validation or feedback messages for important user actions such as login, submission, booking, ordering, or registration.
- Students should create a logical user journey, beginning from the application's entry screen and ending with the successful completion of the main task.
- Students may use Figma, Android Studio, Flutter, Adobe XD, or any other approved UI design tool.
- Students should use dummy data wherever actual databases or APIs are not required.
- Students must submit the UI screens along with a navigation flow diagram showing how the screens are connected.

Annexure A - QUESTIONS

- 1. A student has recently started following a fitness routine and wants to monitor daily activities such as walking, exercise, and calories. The student also wants to understand progress over time. Design a simple mobile interface that supports this requirement.**

Answer:

1. Application Name:

FitTrack – Fitness Activity Monitor

2. Objective:

To design a simple mobile application that helps students monitor their daily walking, exercise, and calorie activities and view their fitness progress over time.

3. Screens:

Screen 1 – Welcome / Login:

- App logo: FitTrack
- Email / Username field
- Password field
- Login button
- Create Account button
- Forgot Password option

Screen 2 – Home Dashboard:

- Greeting: “Good Morning!”
- Today's steps
- Calories burned
- Exercise duration
- Daily goal progress
- Buttons/cards for:
 - Walking
 - Exercise

- Calories
- Progress

Screen 3 – Walking Activity:

- Steps walked today
- Distance covered
- Walking time
- Step goal
- Progress bar
- Start Walking button
- Stop button
- Daily walking history

Screen 4 – Exercise Tracking:

- Select exercise type:
 - Running
 - Cycling
 - Gym
 - Yoga
- Exercise duration
- Calories burned
- Start Exercise button
- Save Activity button
- Confirmation message after saving

Screen 5 – Calorie Tracking:

- Calories consumed
- Calories burned
- Daily calorie goal
- Add food/activity option
- Calorie progress bar
- Add Calories button

Screen 6 – Progress:

- Weekly progress chart
- Steps per day

- Exercise duration
- Calories burned
- Weekly goal percentage
- Comparison with previous week

Screen 7 – Profile / Settings:

- Student name
- Fitness goal
- Daily step goal
- Daily calorie goal
- Exercise goal
- Notification settings
- Logout

4. Main UI Components:

- Text fields
- Buttons
- Icons
- Cards
- Progress bars
- Lists
- Charts
- Bottom navigation
- Dropdown/select options
- Confirmation/feedback messages

5. Suggested Design:

Use a **clean and simple student-friendly mobile UI:**

- Light background
- Consistent font throughout
- Fitness-related icons
- Card-based dashboard
- Clear spacing and alignment
- Bottom navigation: **Home | Activity | Progress | Profile**

FITTRACK – FITNESS ACTIVITY MONITOR

NAVIGATION FLOW
